CEO of transportation & traffic organization of Mashhad announced phase shifting of command lights in several major intersections and said:
Classification of phase shifting is the most important solution to reduce interference and increase safely level of transportation system users.
The survey conducted by experts of this organization and assessed need of shift classification in phasing in intersections during this intersection of Reza-beasat.
Shifted its phase from 2 to 3 and also change separated west and east path of this intersection, reports by public relation department of transportation 8 traffic organization.
At the end Emami pointed out that project is also being investigated in shohada square and with experts confirmation will soon be implemented, and then said:
Shifted its phase classification of intersections can help to reduce interference traffic safety.
